DISTRI-LTS
Terminal Loading

DISTRI

DISTRI-LTS (Long Term Storage)
for MID approved loading data

LTS-SERVER

Encrypted RAID 1 disk system With Trusted Platform Module 2.0 for storing encryption keys locally.
Dual Hot plug capable redundant power supply.

MID LEGISLATION

READY

It establishes the essential requirements that the measuring instruments will have to satisfy, if they are subject to legal metrological control in an EU country, and the conformity assessment that they have to undergo prior to their placing on the market and putting into use.

ENABLING DIGITAL

ECONOMY

MID-compliant loading receipts in a digital form enables digitalization of BOL and financial processes.
LTS creates centralized digital loading receipts archive. No paper document needed.
If paper document is mandatory they can be printed in a centralized location either manually or automatically.

DISTRI- LTS features

Independent and secure loading audit trail.

Availabe for common flow computers.

Ultimate performance and security.

Extending Terminal Automation System's (TAS) transaction archive memory.

Simplifies maintenance of Terminals MID compliance.

Easy MID Approaval

Enable agile product changes at loading racks.

Scalable HW for diffrent terminal size

DISTRI- LTS hardware

Hardware provides key protection and acceleration for disk encryption

Can be installed both with serial or IP networks.

Field cabinet, printer and UPS included

SERVICES

TECHNICAL SUPPORT

Technical Support service is available from Distri, please ask quote

REMOTE MANAGEMENT

Distri provides Remote Management Service for each delivered terminal system. Remote service is established thru VPN tunnel

CUSTOMER SOLUTION

Distri offers feasibility studies for preparing customer case specific solutions and itemized bid.
On demand we can also seek Flow Computers* and your operative practice specific certifications with local notified body

Easy MID Approoval

Due to the customer specific differences in Flow Computer usage Distri offers currently MID Approval support based on MID module G (i.e. case specific study with a notified body), but the concept of DISTRI LTS is also under certification process, where Welmec 8.8 based study against Welmec Software guide is expected to simplify the LTS based MID approval for customers of Distri Consulting Oy

Enabling digital Economy

Having MID-compliant loading receipts in a digital form enables digitalization of Bill-Of –Lading creation and delivery for the necessary recipients according to your finance and control processes.

Digital Loading Archive

DISTRI LTS can be used for creating centralized digital loading receipts archive

o.

If internal audit rules or taxation legislation requires receipts storage for several years keep time, DISTRI LTS allows easily controllable, auditable and reliable archiving as needed.
Availability of reliable digital receipts allows also easier **risk management** approaches and risk mitigation practices typical to listed companies having mandatory risk management process due to the corporate governance rules of the stock exchange they are listed.
