

# DISTRI Truck Loading Bay Solution

## LOADING BAY SOLUTION

### DISTRI AS A COMPANY

Distri designs and manufactures technology and engineering products and solutions for the petrochemical industry. Our product and solution focus is on petrochemical liquids and logistics challenges. We have built Truck Loading, Tank Farm and Terminal Solutions already 32 years.

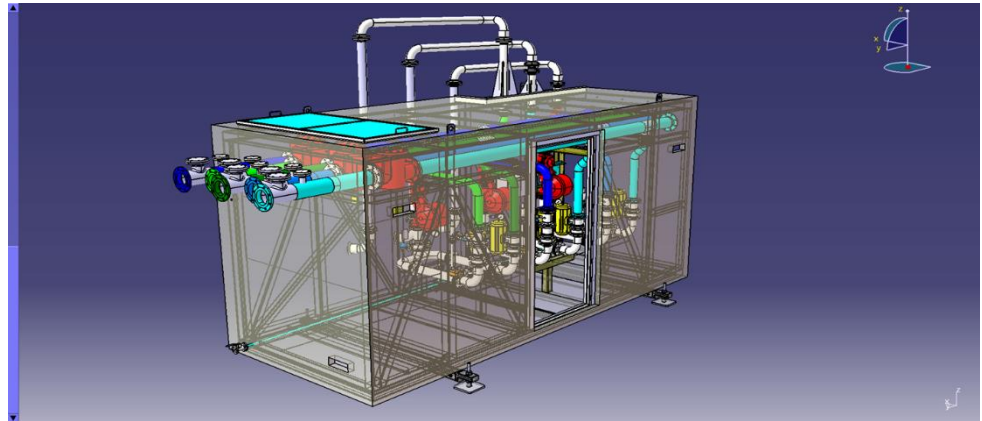

No matter the size of your Solution, Project or System, we are able to bring the best products, solutions, devices and software based on your unique business needs. We are continuously following the latest trends and technology updates as we work closely with leading manufacturers.

Truck Loading Solutions together with hazardous environment and Arctic Climate is daily bred for us.

### MID LEGISLATION

#### READY

It establishes the essential requirements that the measuring instruments will have to satisfy if they are subject to legal metrological control in an EU country, and the conformity assessment that they have to undergo prior to their placing on the market and putting into use.

Truck Loading bay which fits for all liquid products.

Low construction cost.

No construction work at site.

Easy to install and relocate.

Approvals in place. (Ready tested and MID approved).

Fast connections to site infrastructure

MID compliant hardware

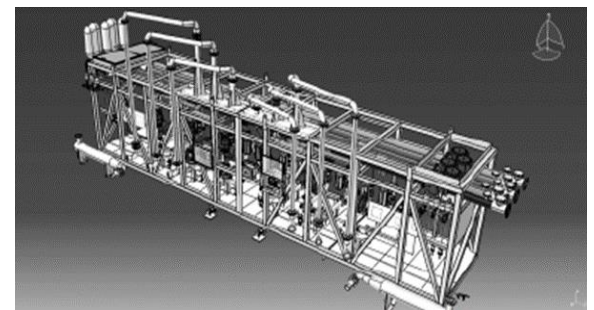

Additive injections readiness in place.

Operation can be done as a stand alone or thru Terminal Automation System (TAS).

Easy to modify into terminal configuration.

Loading Bay Solution brings efficiency and value while reducing downtime, safety/security risks, and costs.

Distri experts help you plan, define and design the right match for your Truck Loading Bay solution
